To whom it may concern:

We highly recommend AG Reliable for your next home project. Allen completed two substantial projects on our 200-year old home in a timely and professional manner.

Our first project involved the update of a 1970s style bathroom and the conversion of a small 4th bedroom into a master bath. When challenges typical of an antique home arose, Allen consulted with us on the best, most cost effective solutions. We still get compliments on our new bathrooms. Our family bath is functional and durable. Our master bath is a sanctuary.

We immediately thought of Allen when we needed emergency work on another section of our house 18 months later due to decades-old water and termite damage. Once again, Allen came through with a high-quality, budget-friendly solution. He even provided great advice on preventing future problems. We really appreciate Allen's attention to detail - especially with the newly installed, energy efficient doors and windows.

We would gladly elaborate further so feel free to call us evenings before 9pm.

Regards,

Sara E. [REDACTED]
